-

---

# How to Install SysTools Excel Recovery Software?

**Installation Steps, which are required to be followed, are self descriptive in nature:**

- Click the 'Download' button
  - A box will pop out, which is named as systools-excel-recovery.exe
  - For downloading the FREE demo version of SysTools Excel Recovery software, click the 'save file' button
  - Once the download is complete, click the 'Open' button, which shows you an installation setup window
  - Now, click the 'next' button
  - Check the "I accept the agreement" option
  - Click the 'next' button
  - After accepting the agreement, it will show you the installation path. If you want to change, then select the required path and click the 'Next' button
  - And at last, click the 'Install' button
  - After completing the installation, it will show the confirmation window with a close button
  - Click the 'finish' button
  - When you click the finish button, then the main window of the application will open, where you can perform the required process
-
